Professional Summary

Results-driven Java Developer with 3.5 years of experience in designing, developing, and maintaining scalable enterprise applications using Java, Spring Boot, and Microservices architecture. Experienced in developing RESTful APIs, backend services, and enterprise-level applications with strong knowledge of object-oriented programming, database management, and software development lifecycle. Skilled in delivering high-performance applications, troubleshooting production issues, and collaborating with cross-functional teams in Agile environments.

Technical Skills

Programming Languages

- Java 8/11/17
- JavaScript
- jQuery
- HTML5
- CSS3

Frameworks & Technologies

- Spring Boot
- Spring MVC
- Hibernate / JPA
- Microservices
- RESTful APIs
- jQuery
- AJAX

Databases

- SQL Server

Tools

- Git
- Maven
- Postman
- IntelliJ IDEA

Professional Experience

Sutherland Global Services – Chennai, India

Sr Assoc-Platform Soln_DES - (July 2021 – Present)

Responsibilities & Achievements

- Developed and maintained enterprise web applications using Java, Spring MVC, and Spring Boot.
- Designed and implemented RESTful APIs for internal and client-facing applications.
- Developed reusable backend modules to improve system maintainability and scalability.
- Worked extensively with SQL Server for database development, query optimization, and stored procedures.
- Developed responsive UI components using JavaScript, jQuery, HTML, and CSS.
- Created unit test cases using JUnit to improve code quality and application stability.
- Resolved production defects and performed root cause analysis for critical issues.
- Participated in Agile ceremonies including sprint planning, daily stand-ups, and retrospectives.
- Collaborated with QA and frontend teams to ensure smooth delivery of features.
- Performed code reviews and maintained coding standards across the project.

Technologies Used

Java, Spring Boot, Spring MVC, SQL Server, REST APIs, JavaScript, jQuery, JUnit, Git

Projects

Account Payable Management System

- Developed backend modules for invoice processing and payment tracking.
- Implemented REST APIs for vendor management and transaction processing.

- Created database queries and stored procedures using SQL Server.
- Enhanced application performance by optimizing API response time and SQL queries.
- Worked closely with business teams to understand and implement financial workflows.
- Fixed production bugs and provided application support during releases.

Technologies

Java, Spring MVC, Spring Boot, SQL Server, REST APIs, JavaScript, jQuery

Education

Bachelor of Engineering in Computer Science (**B. Tech - CSE**)

Perunthalaivar Kamarajar Institute of Engineering and Technology

Karaikal, India 2016 – 2020

Certifications

- Building Scalable Java Microservices with Spring Boot and Spring Cloud – Google Cloud
- Learn JavaScript – Scrima
- Tools for Data Science – IBM
- OWASP Top 10 – Risks 6-10 - Infosec
- OWASP Top 10 – Welcome and Risks 1-5 - - Infosec
- Previous OWASP Risks – Infosec
- Generative AI for Java and Spring Development – SkillUp EdTech

Key Strengths

- Strong analytical and debugging skills
- Excellent communication and teamwork
- Experience in Agile and Scrum methodologies
- Quick learner with adaptability to new technologies

Declaration

I hereby declare that the information provided above is true to the best of my knowledge and belief.
